

Viewfinder

You will need:

- A4 card (an old cereal box is fine)
- Ruler
- Scissors
- Fine string or wool

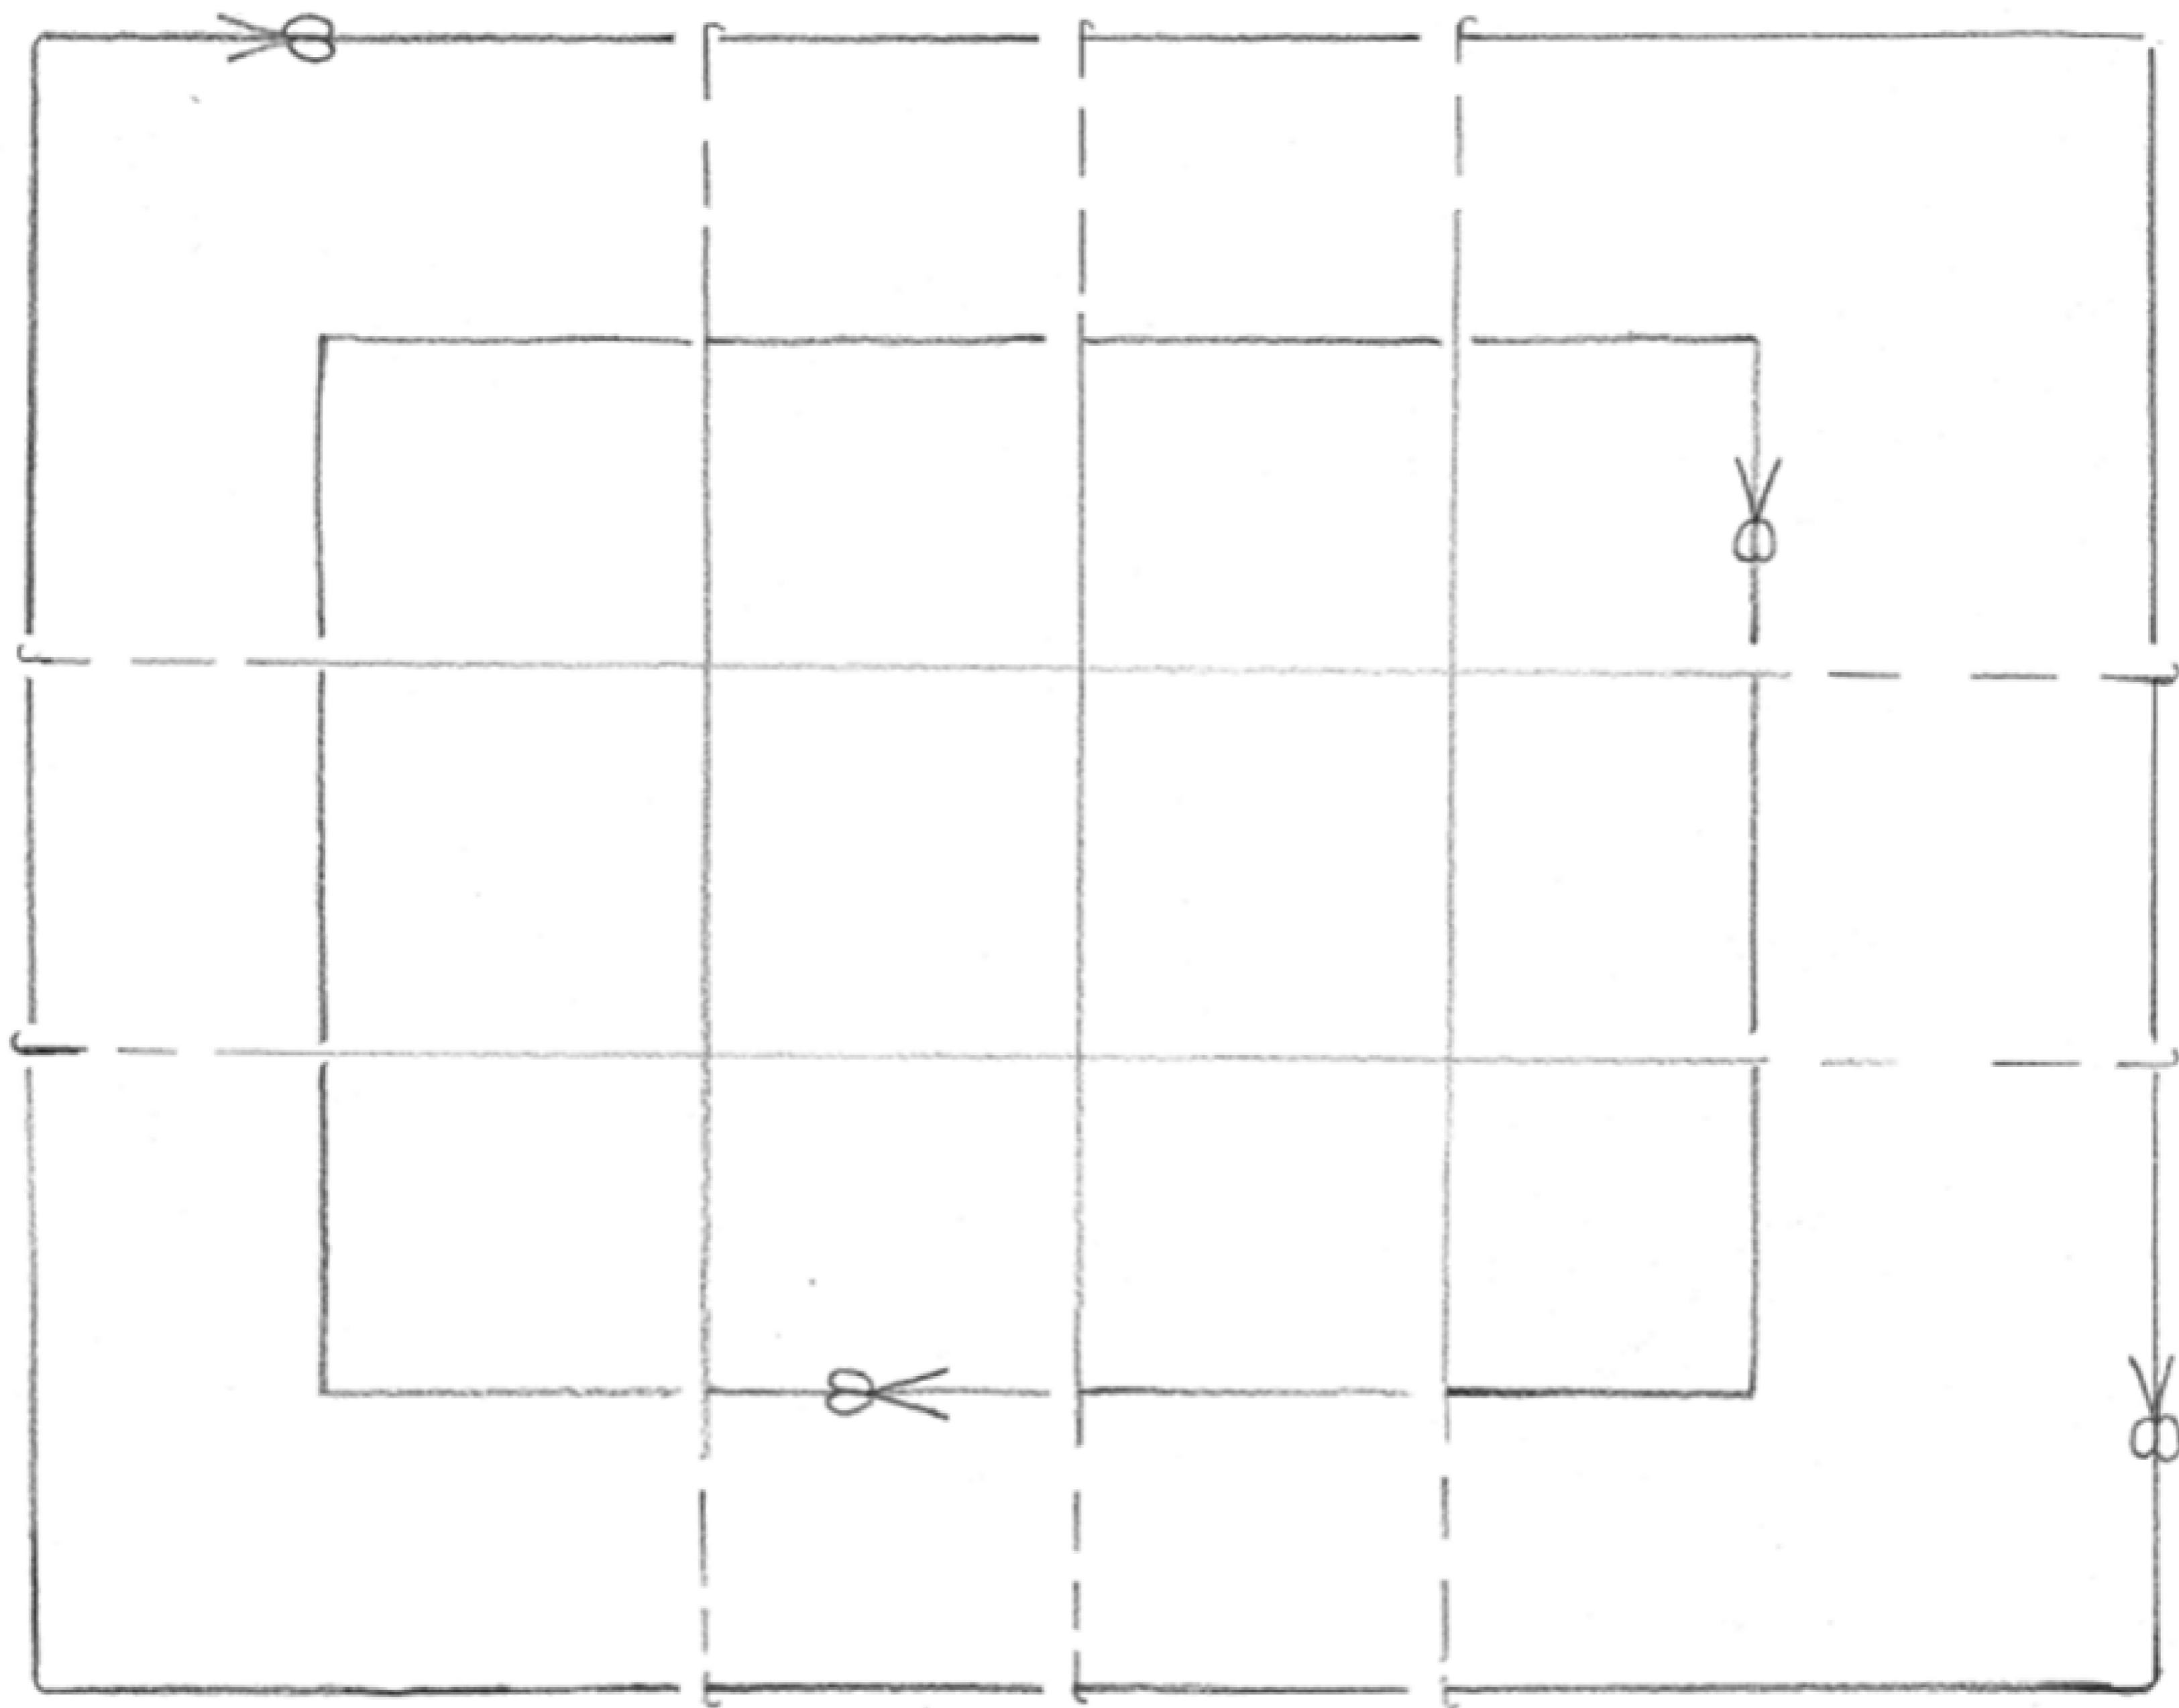

To make your viewfinder:

An old mount card can make an ideal viewfinder, but if you want to make your own, this is how to do it.

1. Measure and cut a square or rectangle into the centre of the card. (see reverse for a template)
2. If you would like to create a grid to guide your drawing, tape string or yarn at regular intervals to the reverse side of your card. Our example has string at 4cm spacings.

Use string of yarn for the grid
